*Sprinkled with cold mineral water, it is a refreshing thirst quencher, especially for those who find anti-alcoholic drinks far too sweet. With its fruity bouquet, it is milder, rounder than vinegar and has the unique characteristic that its typical acidity does not mask the own taste of food. Therefore, like to use instead of lemon juice, as it provides a pleasant acidity and fruitiness, but hardly develops its own taste, but supports the flavor nuances of the other ingredients through its high proportion of apple acid.*

*The Verjus keeps open in the refrigerator for several months. It can also be easily frozen to store for longer.*

*You can also make Verjus ice cubes*
